Education

Bachelor's Degree at **KPR Institute of Engineering and Technology** 2023–2027 (7.5/10)
Class 12th from **Sri Vijay Vidyashram Senior Secondary School (CBSE)** 2022–2023 (319/500)
Class 10th from **Sri Vijay Vidyashram Senior Secondary School (CBSE)** 2020–2021 (392/500)

Work Experience

Software Developer Intern @ Zettaone Technologies July 2025 (1 month)

- Developed full stack solutions including **Climora**, a React Native app delivering real time weather and soil insights using location based APIs.
- Built production ready **OCR and computer vision systems**, including a QR/Barcode scanner and an AI model for PCB component deviation detection using Flask, EasyOCR, and CV techniques.

Research Intern @ Providence University, Taiwan October – November (2 months)

- Developed a **CNN based pneumonia detection system** for chest X-rays, incorporating attention mechanisms and **Grad-CAM** for clinical interpretability.
- Addressed key dataset challenges **imbalance, domain shift, and label noise** through preprocessing, augmentation, and evaluation, collaborating with faculty to refine model performance.

Projects

Periodontal Disease Prediction
Developed a CNN-based deep learning model on panoramic dental images for periodontal disease prediction, leveraging K-Fold cross-validation to improve reliability and support early diagnosis.
CLIMORA
Developed Climora, a React Native app providing real-time weather and soil insights through geolocation-based APIs and custom search functionality.
VISYRE
Built a mobile app with React Native and Flask to decode QR/barcodes and extract text via EasyOCR, streamlining data capture and reducing manual entry.

Research Work

Pneumonia Detection Using Deep Learning (Ongoing)
Designing a CNN based classification pipeline for pneumonia detection, incorporating attention based interpretability and addressing dataset imbalance, noise, and domain shift to improve model generalization across diverse X-ray datasets.

Skills

Programming Languages	Python, Java, JavaScript
Frameworks & Libraries	Flask, Scikit-learn, OpenCV, YOLO, TensorFlow, PyTorch
Databases	MySQL, MongoDB
Tools & Platforms	Git, Streamlit,React, VS Code
